EXTERIOR FIRE POLICY

- Owners are responsible for providing instruction to guests/tenants on exterior fire control.
- Guests, tenants and owners must comply with all state, county and local laws, rules and regulations regarding exterior fires.
- Open, on- or in-ground fires are not allowed.
- Burning of trash or solid materials other than wood, coal or charcoal is not permitted.
- Accelerants other than those made for lighting charcoal are not permitted.
- All exterior fires must be attended by an adult.
- AB/ABC fire extinguishers or water hose capable of reaching fire must be in vicinity of fire.
- Exterior fires that are unsafe or against rules may be required to be extinguished.
- Exterior gas fire containers must be certified, approved and in good condition.
- Wood burning exterior fire containers must be approved and are permitted as long as they are manufactured units of sturdy metal or noncombustible design with a metal cover made for and fit to the receptacle.
- Openings and covers must have no greater than 1/4" mesh or equivalent openings.
- Custom-built fire containers may be authorized after a review of the design and construction specifications showing compliance.
