CMA Annual Membership Meeting

Coolfont Mountainside Association

Coolfont Mountainside Association
2026 Annual Membership Meeting

Location: Coolfont Resort and via ZOOM

Date: Saturday, September 19, 2026

Time: 10:00 am

AGENDA

I. Call to Order, Proof of Quorum

II. Certification of Meeting Notice

III. Election/Voting Procedures
Georgia Lowman, Chair, Nominating Committee
Jaron Ervin, Board Liaison

1. Appointment of Election Clerks
2. Nominations from the Floor
3. New Candidate Statements (optional)
4. Information on voting process(es)

IV. State of the Mountainside – Norm Rosenberg, President

V. Directors' Comments

VI. Financial Reports – Jaron Ervin, Treasurer

VII. Committee Reports

1. Site Manager – Stephanie Rebant
2. Water & Sewer – Vesta Kimble, Chair
3. Communications – Dawne Holz, Chair
4. DACC – Gary Farmer, Chair
5. Firewise – Henry Lynn, Chair
6. Recreation/Trails – Chris Peabody, Chair
7. Recreation/Pool – Stephen Crane, Pool Manager
8. Neighborhood Watch – Steve Katz, Chair
9. Social & Welcome – Pam Sanders, Chair

VIII. Task Force Reports

1. Barn – Gary Farmer
2. Sports Courts – Chris Peabody

IX. New Business

Notice of Business - Additional Subjects Requested by Members:

1. Proposed CMA Bylaws Amendment: Modify Section 12.3 - Meetings of Members — Define the number of subjects that any CMA Member may have included in the Annual Meeting.
2. Proposed CMA Bylaws Amendment: Add Section 6.X — Limitation on Common Ownership and Household Representation on the Board
3. Proposed CMA Bylaws Amendment: Modify Section 8.2(k) — Clarifying That the Budget Overrun Cap Applies at the Line-Item Level
4. Proposed CMA Bylaws Amendment: Add Section 7.1(a) — Minimum Approval Threshold for Election in Uncontested Races
5. Threats of Personal Financial Liability to Volunteers - Questions for Discussion

X. Close of Elections For Directors, Minutes, and Budget - 1 pm

XI. Owner's Comments

XII. Election and Voting Results

XIII. Adjourn

Coolfont Mountainside Association

Annual Treasury Report

2026 Annual Membership Meeting

Thank you to the Finance Committee for their work this year, including Rosemary Bigelow, Dave Creason, Valerie Creason, Tim Flanagan, Dawne Holz, and Cindy Kelleher.

CMA General Fund

FY2025 Close. The Association ended 2025 with expenses at 104.3% of budget and income at 104.3% of budget, finishing the year with $750.77 in excess income, applied to members' equity.

2026 Budget Year to Date. Through August 31, 2026, total income was $266,408.76 against a $275,090 annual budget (96.8%), and total expense was $189,989.22 against the same budget (69.1%), leaving net ordinary income of $76,419.54. This surplus is significantly overstated as a picture of year-end results — the full annual assessment is billed and recognized in January, while most operating expenses occur steadily across the year, so this figure will narrow substantially by December and should not be read as a windfall.

One line item is a significant exception to normal budget tracking: Account 790, Legal Fees, budgeted at $10,000 for 2026, has already reached $32,795.49 — 327.96% of budget, a $22,795.49 overrun — due to litigation-related retainers approved by the Board. I flagged this overrun to the Board on July 10 and proposed a revised 2026 budget. Under Bylaws §8.2(k), Board-authorized overruns are capped at 10% per line item or 5% of the total budget; the Legal Fees overrun exceeds that cap and has no applicable exception. The Board's August 29 deadline to act on notice of this issue passed without a vote. As a result, a revised 2026 budget is not on today's agenda for membership consideration.

Reserve Fund. As of September 11, 2026, CMA reserves held at CNB Bank total $463,478.52 — $48,444.86 in checking, $145,440.95 in the Savings Reserve account, and $269,592.71 across four CDs maturing between September 2026 and August 2027. Total members' equity stood at $435,123.41 as of August 31, 2026, with an additional $81,900.18 in 2026 net income not yet closed to that account. The 2025 Reserve Study requires a minimum reserve balance of $92,933 at 12/31/26; the Association remains well above that threshold. Allocated 2026 reserve projects total $223,988 (paving, gravel roads, entrance signage, pool storage and filter sheds), plus a $217,500 carryover for Barn Renovations not completed in 2025.

2027 Proposed Budget. The Finance Committee's proposed 2027 General Fund budget totals $322,950 in both income and expense, setting the assessment at $2,100 per property — an increase of $300, or 16.7%, over the 2026 assessment of $1,800. Notable changes include Legal Fees raised from $10,000 to $25,000 at Board request; Site Manager increased from $25,080 to $31,000 reflecting updated contract terms; a new $25,000 CMA Professional Management placeholder pending a defined scope and vendor quote, which will require separate Board approval before any funds are spent; and a new $3,500 Pool Pass Printer line, fully offset by a matching increase to Pool Fee income. Capital Cash Reserve funding increases modestly to $110,500, consistent with the 2025 Reserve Study.

CMAWS (Water & Sewer)

2026 Budget Year to Date. Through August 31, 2026, total income was $79,088.18 against a $207,700 annual budget (38.1%), and total expense (excluding loan principal) was $122,345.57 against $186,055 budgeted (65.8%), producing a net ordinary loss of $43,257.39 against a budgeted net gain of $21,645 — a $64,902.39 negative swing. Water usage fees are running well behind trend for the year, driven by a genuine reduction in water sales; that reduction, combined with elevated leak-repair costs this year, pushed the CMAWS operating checking account to a negative balance of $1,665.71 at the August 31 cutoff. September billing has since brought the account back to a positive balance.

Loans and Reserves. As of August 31, 2026, CMAWS carries three outstanding loans: the NRWA Lagoon Liner Loan ($78,261.47), the NRWA Reservoir Rehab Loan ($95,713.93), and the CMA Reservoir Rehab Loan ($39,572.56, owed to CMA's General Fund) — $213,547.96 in total. CMAWS also holds $81,565 in internally designated reserves ($35,675 Capital Improvement Fund, $45,890 Repair/Replacement Fund).

2027 Proposed Budget. The proposed 2027 CMAWS budget totals $276,582 in both income and expense, balancing to $0 net income — but this budget is built entirely on the assumption that the Public Service Commission approves a pending emergency rate increase of approximately 24% or more. If that increase is not approved, income at current tariff rates would total only $158,343 against the same $276,582 in expense, producing a net loss of $118,239. The Committee's submission includes no contingency plan for partial, delayed, or denied PSC approval. Major cost drivers include formalizing the Water System Operations Manager role ($20,500 to $49,952) and increased water system labor for leak repairs and fixture replacement ($10,000 to $30,000).

Delinquency Status

There are no delinquent accounts on either the CMA General Fund or CMAWS as of this meeting.

Closing

This concludes the Treasury Report. Members are encouraged to review these figures and raise questions during today's meeting or with me directly at any time.

Respectfully submitted,

Jay Ervin
Treasurer, Coolfont Mountainside Association

CMA COMMITTEE REPORT

Committee/Task Force: *SITE MANAGER*

For Month/Year: *August / 2026*

As of: September 15, 2026

Submitted By: *Stephanie Rebant, CMA Site Manager*

Questions / Discussion Points / Approvals Needed (for the Board)

(1) Approve payment for August Site Manager Invoices

(2) **Request up to $225 for Whippoorwill Court and Whipporwill Way sign request** signage that indicates Whipporwill **Way** is to the left, and an arrow be put on the existing Whippoorwill Court sign pointing straight ahead

(3) **Request authorization to advertising for 2027 pool staff** - CPO, Pool Manager & 3 attendants

(4) **Site Manager requests $90,870 to repair blacktop roads and set up for future paving.** The board needs to find or reallocate $2,290. NOTE - $88,580 is allocated in reserve funding for paving this year.

👉Warbler's Way is the worst paved road in the community, we are going to loose that road if we don't get it fixed - fix items Warbler's Way Area (items 11, 12, 13, 14, 15 on the attached map)- which is $38,400 this is the only section that will be overlaid this year and this road will last 3 to 5 years pending no catastrophic weather or other events in theory without maintenance

👉We prioritize and fix all the other mill and patch items needed and the full depth repairs on the estimate which are crucial:

Herbert Quick Drive Entrance Area: Items 23, 25, 26, 27, 28: $18,190
"I" and "J" Section on Mountainside Road: Items 6, 7, 8, 20: $10,450
"Pullout of Recreation Way to Mountainside Road up through the sharp ben past Salmon Lane "A - E" Sections: Items 1, 2, 3, 5: $10,430
Bocat Drive "Q" & "R" Sections: Items 16, 17, 18, 19, 22, 29: $13,400
Total: $52,470

Site Manager Requests authorization to hire Ralph Weaver & Son, Inc at a cost of $90,870 to conduct the following asphalt repairs:
1, 2, 3, 5, 6, 7, 8, 11, 12, 13, 14, 15, 16, 17, 18, 19, 22, 23, 24, 25, 26, 27, 28, 29

(5) **Forestry budget has $15,000 allocated - would like to email board the estimate for approval and a map of the trees to be removed**

Annual / Monthly Report

Pending Tasks:

- Draft snow plow contract
- **MAPS** - finalize draft and print and .pdf format of the following that can be used for estimates and taskings:
    - Gravel road measurements for each gravel road in the community
    - Paved road measurements for all paved roads in the community
    - Map of all ditches in the community
    - Map of all culverts in the community
    - These maps are a simplified version that can be handed to a contractor for estimates and taskings and is the basis for annual and 1 to 3 year plans for paving and culvert replacements
    - Further work is being conducted to take Tom Holtz and others past work and put on the map priority culvert repair and replacement, Eric has done a visual of each culvert to confirm the status and priority needed

- **Road Maintenance** - Brian Yost has some work to do with his smaller machine for some ditches and mowing
- 🌲Forestry plan - map will be given to Matt Keefer - Keefer's Legacy Tree Service
- 🏠 Ensuring CMA facilities (pump houses are cleaned on a monthly basis)
- 🏊 Recommend hiring pool staff August 2026 for 2027 pool season
- Money in budget for entrance sign update this year does the board want anything done

Accomplished monthly tasks August 2026
- Normal site manager duties - upkeep of grounds, roads, emergency tree removal response, upkeep and maintenance of facilities
- Community assistance with trash, parking and DAAC violations to assist owners with compliance standards

COOLFONT MOUNTAINSIDE ASSOCIATION

COMMUNICATIONS COMMITTEE REPORT

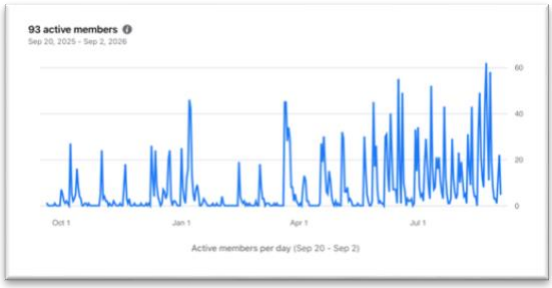

ANNUAL MEMBERSHIP MEETING – SEPTEMBER 19, 2026

Submitted by Dawne Holz *Information as of September 4, 2026*

The Communications Committee continues to manage the Association media, including the Facebook page, Google Group, and Website. Thank you to the volunteers who have helped keep these systems running. We are always looking for more volunteers to help – please let us know if you're interested!

FACEBOOK

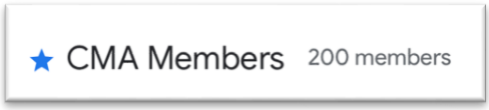

Thank you to Gina Baum for serving as admin until May 2026. Heidi Splane volunteered to take over in June and has been doing a great job of keeping the page active with posts about local happenings and CMA news. Check out the graph of active members per day!

- There are currently 108 members in the group (up from 101).
- There were 93 active members (up from 74).
- There were more than 80 new posts added in the past 12 months.
- Admins: Heidi Splane and Dawne Holz.

GOOGLE GROUP

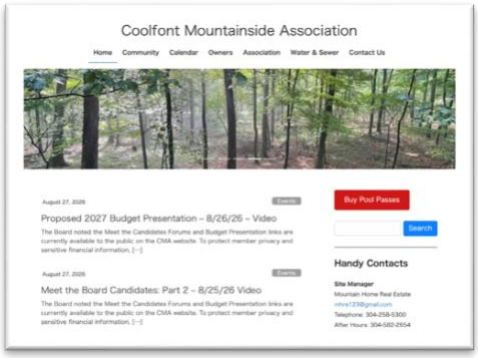

Thank you to Clare Miller and Barbara Shulman co-admins for the Group. We will be updating the 2020 User Policy. We hope to complete this by the end of the year.

- There are currently 200 subscribers – some lots have multiple members.
- 28 new members were added and 43 members were removed – moved away or opted out.
- Admins: Clare Miller, Barbara Shulman, and Dawne Holz.

WEBSITE

Thanks to Erfan Zayer for his work as webmaster through March 2026. Andrew Skinner kindly stepped in to take as webmaster: maintaining the virtual server, managing domain registration, and doing all the “behind the scenes” work of keeping the site running. Also, big thanks to Heidi Splane for another year of help with most of the content management updates. Admins also keep the Word Press software, plug ins, and themes up to date.

- Several contractors were added to the Local Resources & Contractors page.
- Membership Directory was updated as ownership changed.
- 28 new posts were added – keeping members informed.
- Word Press software continually updated. We are currently running WP 7.1.
- Admins: Dawne Holz, Heidi Splane, and Andrew Skinner.

CMA Monthly Status Report

Committee/Task Force: DACC Committee

For Month/Year: September / 2026

As of: September 15, 2026

Submitted By: Gary Farmer, Chairperson

Questions / Discussion Points / Approvals Needed (for the Board)

1. The DACC Design and Building Regulations are being revised for submission to the Board by the end of the year for review. The revision will include new designs such as electric vehicle charging stations, electric generators, external lighting controls, and water cross-connection and backflow requirements. Home owners are encouraged to submit their ideas for new items to be added or existing items to be revised.

Monthly Report

1. Received two submitted applications since the August Board meeting. One application was approved as submitted while the other was returned with the reviewer's comments regarding non compliance with the existing guidelines. The revised design is expected to be resubmitted soon for review.

2. Year to date, there have been eleven applications submitted for review. Of these eleven, nine were approved as submitted, one was approved as resubmitted, and the eleventh expected to be resubmitted soon.

FIREWISE ANNUAL REPORY

1 message

Henry Lynn <hflynn2@gmail.com> Sat, Sep 19, 2026 at 9:18 AM
To: Coolfont Board <coolfont.board@gmail.com>, Valerie Creason <Valerie.Creason@gmail.com>

Here is a brief narrative of annual status for the fire Wise committee:

This has been a very quiet year. I have done an actual physical drive around 2 to 4 times per month to look for any fire hazards. The weather has been fantastic for fire safety in that we have had Intermittent periods of sunny, weather and rain such that there have been no drought conditions and there were no local or state warnings for special fire prevention. During drive arounds, I did not see hazardous at any properties suggesting fire risk. Culverts around the Mountainside roads have been appropriately cleaned so that there has not been accumulation of debris. We still have an excessive number of down trees and brush in the woods of common lands. However, there has been no report of any fire issue during the year. We had a change of committee Membership with Vesta Kimble resigning from the committee due to other obligations and circumstances and Matthew Malarkey joining the committee. We only have two members of the committee, Henry Lynn and Matthew Malarkey.
We only have two members of the committee, Henry Lynn and Matthew Malarkey. We only have two members of the committee, Henry Lynn and Matthew Malarkey. We need more members. I have suggested to the board that the Firewise committee and the neighborhood watch committee be consolidated to a single committee. This recommendation was not approved by the CMA board.

Fire Wise safety checklist were sent to everyone on the CMA member group list. I also sent a complete list of fire Wise related YouTube videos as an educational activity. There are plans to have a Zoom fire Wise informational meeting in early October 2026. We were way I had a required volunteer hours for 2025 and this continues to be the case for 2026 although our compilation is still in process. The National fire Wise system requires an annual report in November.

Committee/Task Force: *<Social and Welcome committees*

For Month/Year: September, *2026*

As of: September 7, 2026

Submitted By: *Pam Sanders, Social Committee*

Questions / Discussion Points / Approvals Needed (for the Board)

<If any, enter in whatever format you wish. Bullet or numbered listing, etc...>

Monthly Report

Welcome Committee: Rosemary Bigelow

Very busy month for the Welcome Committee - sent 5 Welcome letters; Joanie Zuckerman and I did a Welcome Visit at the pool with the Andersons (R2/R3). I had a Welcome party at my house for 3 new owners - the Murrills (K10), Crise/Connor (O6) and Castle/Erickson (P6).

Social Committee: Pam Sanders

1. The Annual Dinner will be held at Charlottes Café tonight (9/19) at 5 pm. Reservations have already have been made.

2. Our next potluck dinner will be held at Norm Rosenberg's on 10/3.

CMA Monthly Status Report

Committee/Task Force: Barn Task Force

For Month/Year: September / 2026

As of: September 16, 2026

Submitted By: Gary Farmer, Chairperson

Questions / Discussion Points / Approvals Needed (for the Board)

1. The Barn Task Force is working to present a recommended solution to the Board by the end of the year for review. The presentation will include a review of the process followed, options considered, evaluations and decisions made

Monthly Report

1. The Task Force met on September 01, 2026. Attending were Gary Farmer, Valerie Creason, and Dave Creason. Dave reported his pursuing demolition contractors with an estimated demolition cost of $20,000 with estimated site preparation and concrete pad construction costs totaling between $67,200 and $96,000. Gary has been in contact with companies to sell any salvaged wood resulting from partial or complete demolition. Follow up with estimated costs to follow.
2. The next Task Force meeting is scheduled for September 22, 2026.
3. Year to date, the Task Force has held monthly meetings during which members present the work they performed since the last meeting, this work is discussed amongst the attendees, and future is chosen. The work of the Task Force was broken down into multiple tasks to which members were assigned. Several brainstorming sessions provided several creative ideas including uses of the barn, possible configurations of the barn and its surroundings, and how much of the barn to renovate for future use. The renovations being investigated are reusing the existing barn structure with new exterior siding to replace the deteriorated wood siding, removing the rear addition of the barn, purchasing the neighboring property and repurposing that house as food service and/or restrooms areas, constructing a new barn within the existing foundation. Preliminary scopes of work have been created and estimated prices have been received from contractors.

4. This project is being seen as a phased project so that an initial three-season building can be used by the community as soon as possible with the addition of HVAC, food prep, and restrooms to follow as funds allow.
5. The Task Force's promised deliverable is the presentation by the end of this year of its recommended solution to the Board for their review and consideration. Upon receiving approval to proceed, the Task Force will begin to produce a more detailed scope of work, bills of material, and issue Requests for Quotes (RFQ) from which the project can progress.
6. The Task Force sees the barn not just a building that has deteriorated into a broken shell of its former self, but as a symbol of the community which will be reshaped into a gathering place, cultural center, and event hall for the community.

Coolfont Mountainside Association

Our Challenge

- Our courts are in the range of 40+ years old, beyond their typical useful life (20 - 25)
- The courts were previously repaired several times, patching of cracks and recoating.
- All 4 courts are in poor condition with large, open cracks throughout.
- Most of the surface coating has debonded, including previously installed coatings

Photo 3 – The larger cracks were full depth through the entire asphalt layer.

Photo 2 – An example of a larger open crack.

Photo 4 – Debonding of the several coating layers.

Photo 12 – The soil probe at Location 4 was 10.0" in depth.

Coolfont Mountainside Association

OPTION 1

Rebuild using ½ the tennis court footprint

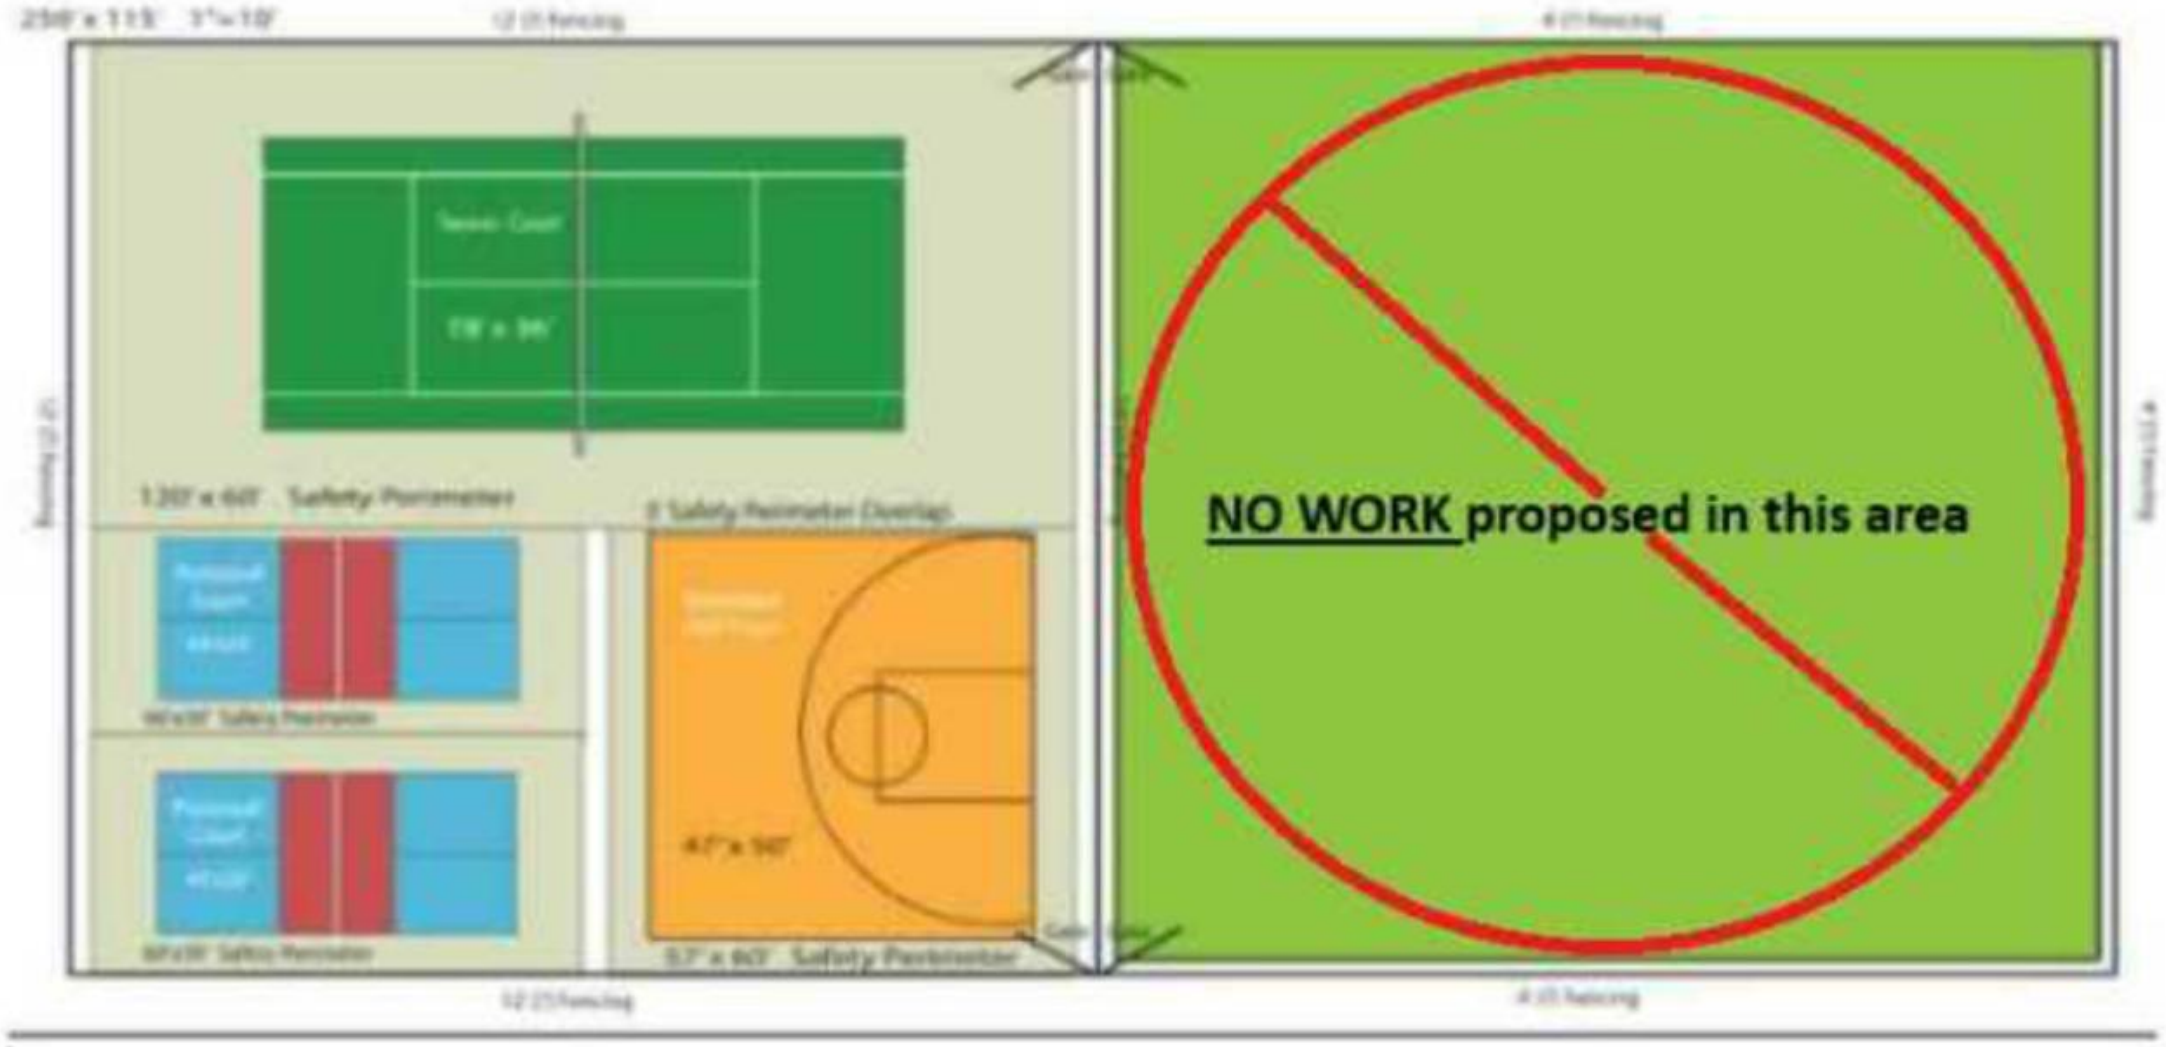

Option 1 Overview

Rebuild Using ½ the tennis court footprint

- What's included:
  - 1 Tennis Court
  - 2 Pickleball Courts
  - 1 Basketball hoop w/small court
- What's it cost:
  - ~95,000
    - $85,000 – Dominion Paving Quote
    - ~$10,000 – Site improvements (Paint fencing, rebuild stairs, misc…)
- Pro's
  - All three types of sports courts included
  - Total cost
- Cons
  - ½ of the current tennis court footprint will remain untouched, looking very unsightly.
  - We have been advised that you cannot just "cover it with mulch", it'll drain onto courts during big storms. Milling it out and disposing will be expensive.

Option 1
Design Layout

Coolfont Mountainside Association

Option 1 – Scope of Work

Asphalt Repair /Overlay-Sports Court — Price: $38,500.00

Scope of Work – Play Court Repair & Asphalt Overlay

- Mill approximately 1**60 square yards** of existing asphalt at a depth of **2 inches** using a.
- Remove and dispose of the milled asphalt material.
- Clean and prepare the milled areas for subsequent asphalt repairs and paving.
- Patch the milled areas back using SM9.5A surface course asphalt.
- Following completion of the repairs/patches, **overlay approximately 1,597 square yards of play court area with 2 inches of asphalt**.
- Place and compact the new asphalt to provide a smooth, uniform surface suitable for play courts.

New Nets, Net Posts, & Concrete Footers — Price: $10,000.00

- **Scope of Work:**
  Layout & Preparation:
  - Verify existing post locations and dimensions.
  - Mark saw-cut boundaries to minimize impact to surrounding court surface.

  Saw Cutting & Demolition:
  - Saw cut around existing tennis post footers to create clean, straight edges.
  - Break out and remove existing concrete footers and embedded post components.
  - Haul off and properly dispose of all debris.

  Excavation as Required:
  - Excavate post holes to the required depth and diameter to accommodate new concrete footers.
  - Prepare subgrade as needed to ensure stable footing.

  Installation of New Concrete Footers & Posts:
  - Furnish and install aluminum ground sleeves (24" long) for 2-7/8" round tennis posts, set to proper alignment and elevation.
  - Furnish and install Douglas® Deluxe Sidewinder Tennis Net Posts, 2-7/8".
  - Set new tennis net posts and sleeves in concrete footers, ensuring posts are plumb, properly aligned, and securely concreted in place.
  - Furnish and install **one (1) new concrete footers for basketball posts**, including excavation, placement, alignment, and concrete installation as required.
  - Set basketball post footers to the required dimensions, depth, alignment, and elevation for the new basketball posts.
  - Finish concrete to the proper elevation to allow for court surface restoration.
  - Allow concrete to cure in accordance with industry standards.

Sport Coating & Coloring - New Asphalt — Price: $30,000.00

- **Coating of Play Surface Tennis/Pickleball/Basketball Court - Approximately 14375 SF**

Birdbaths - Court will be flooded to identify any low areas greater than 2 mm deep (see clarification below). Any areas identified will be leveled with an acrylic patch binder.
Resurfacing - We will then apply 2 coats of acrylic resurfacer to the entire court surface. The resurfacer helps to fill in the voids that naturally occur in asphalt surfaces due to the coarseness of the aggregate.
Color - After proper curing of the resurfacer, we will apply two (2) coats of 100% acrylic SportMaster color coating in Grey **for the out of bounds** and Red **for the in bounds** areas.
Line Painting - Once the color coats have properly cured we will paint the court markings: ***(1) Tennis, (2) Pickleball, (1) Half-Court Basketball*** using textured white paint. All areas to be marked will first be primed using Stripe Rite 100% acrylic emulsion to ensure sharp crisp lines with no bleed through.

Douglas® D-Pro™ 646 MAX Outdoor Basketball Hoop + Installation — Price: $6,500.00

- These adjustable basketball systems are built to the MAX for durability, playing performance and design appeal. Adjusting the goal's height from 6' to 10' is effortless with 2 lift-assist cylinders in play. The unobstructed "Clear View" tempered glass backboard has a rigid aluminum perimeter frame for increased rigidity and performance. All weather system features stainless steel parts and the complete unit has a black powder coat finish for ultimate weather protection.

Coolfont Mountainside Association

OPTION 2 Rebuild using the full tennis court footprint

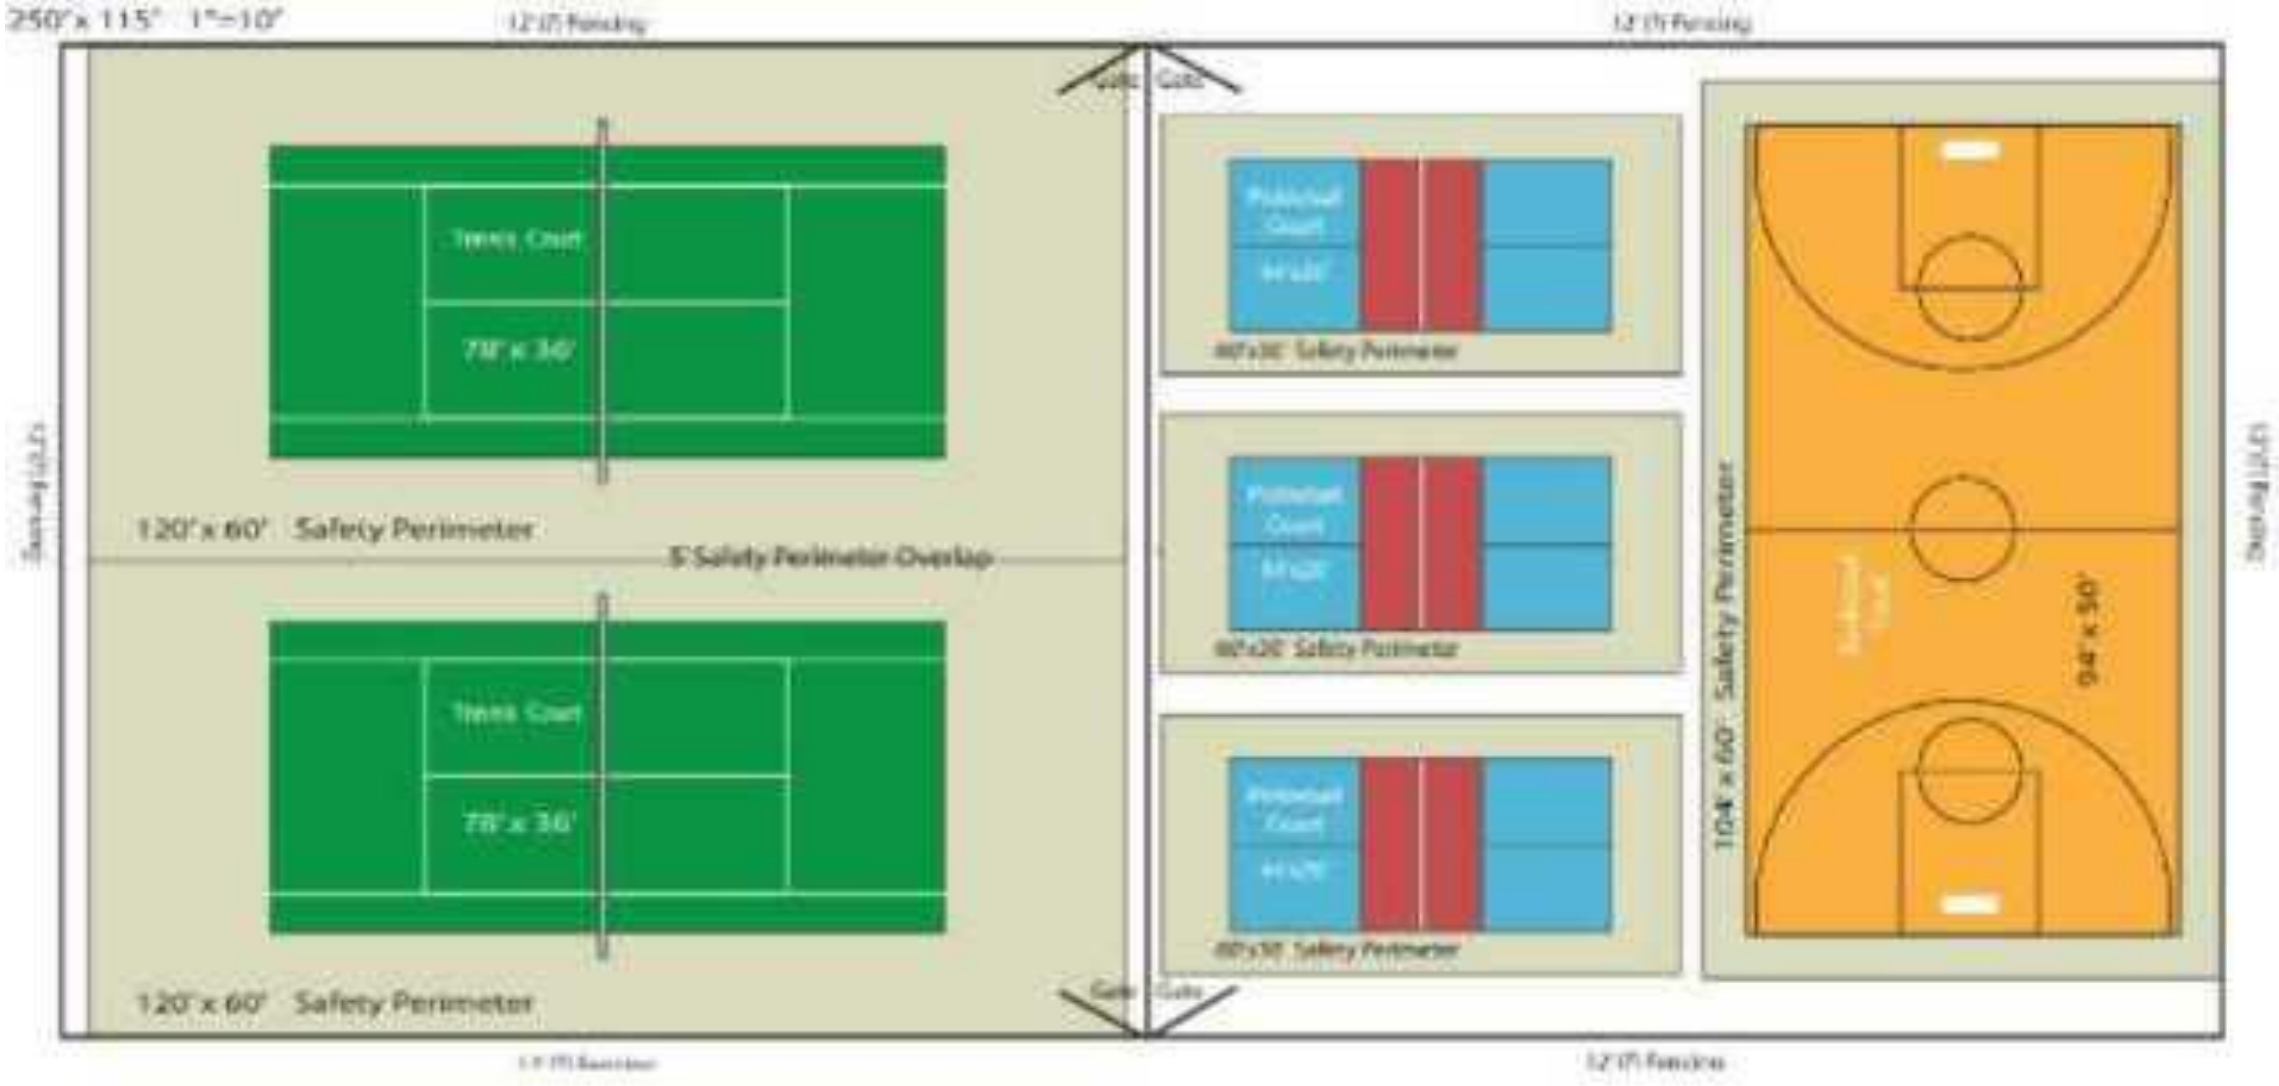

Option 2 Overview

Rebuild Using the full tennis court footprint

- What's included:
  - 2 Tennis Court
  - 3 Pickleball Courts
  - 2 Basketball hoops w/large court
- What's it cost:
  - ~166,750
    - $156,750 – Dominion Paving Quote
    - ~$10,000 – Site improvements (Paint fencing, rebuild stairs, misc…)
- Pro's
  - All three types of sports courts included
  - Leverages full footprint
  - More courts and larger basketball area
- Cons
  - Price is higher

Option 2
Design Layout

Coolfont Mountainside Association

Option 2 – Scope of Work

Asphalt Repair / Overlay-Tennis Courts — Price: $69,750.00

Scope of Work – Play Court Repair & Asphalt Overlay

- Mill approximately **360 square yards** of existing asphalt at a depth of **2 inches** using a.
- Remove and dispose of the milled asphalt material.
- Clean and prepare the milled areas for subsequent asphalt repairs and paving.
- Patch the milled areas back using SM9.5A surface course asphalt.
- Following completion of the repairs/patches, **overlay approximately 3,194 square yards of play court area with 2 inches of asphalt**.
- Place and compact the new asphalt to provide a smooth, uniform surface suitable for the tennis courts.

Sport Coating & Coloring - New Asphalt — Price: $57,000.00

- **Coating of Play Surface Tennis/Pickleball/Basketball Court - Approximately 28750 SF**

Birdbaths - Court will be flooded to identify any low areas greater than 2 mm deep (see clarification below). Any areas identified will be leveled with an acrylic patch binder.

Resurfacing - We will then apply 2 coats of acrylic resurfacer to the entire court surface. The resurfacer helps to fill in the voids that naturally occur in asphalt surfaces due to the coarseness of the aggregate.

Color - After proper curing of the resurfacer, we will apply two (2) coats of 100% acrylic SportMaster color coating in **Grey for the out of bounds** and **Red for the in bounds** areas.

Line Painting - Once the color coats have properly cured we will paint the court markings: ***(2) Tennis, (3) Pickleball, (1) Full Court Basketball*** using textured white paint. All areas to be marked will first be primed using Stripe Rite 100% acrylic emulsion to ensure sharp crisp lines with no bleed through.

New Nets, Net Posts, & Concrete Footers — Price: $19,000.00

- **Scope of Work:**
  Layout & Preparation:
  - Verify existing post locations and dimensions.
  - Mark saw-cut boundaries to minimize impact to surrounding court surface.

  Saw Cutting & Demolition:
  - Saw cut around existing tennis post footers to create clean, straight edges.
  - Break out and remove existing concrete footers and embedded post components.
  - Haul off and properly dispose of all debris.

  Excavation as Required:
  - Excavate post holes to the required depth and diameter to accommodate new concrete footers.
  - Prepare subgrade as needed to ensure stable footing.

  Installation of New Concrete Footers & Posts:
  - Furnish and install aluminum ground sleeves (24" long) for 2-7/8" round tennis posts, set to proper alignment and elevation.
  - Furnish and install Douglas® Deluxe Sidewinder Tennis Net Posts, 2-7/8".
  - Set new tennis net posts and sleeves in concrete footers, ensuring posts are plumb, properly aligned, and securely concreted in place.
  - Furnish and install **two (2) new concrete footers for basketball posts**, including excavation, placement, alignment, and concrete installation as required.
  - Set basketball post footers to the required dimensions, depth, alignment, and elevation for the new basketball posts.
  - Finish concrete to the proper elevation to allow for court surface restoration.
  - Allow concrete to cure in accordance with industry standards.

Douglas® D-Pro™ 646 MAX Outdoor Basketball Hoop + Installation — Price: $11,000.00

- These adjustable basketball systems are built to the MAX for durability, playing performance and design appeal. Adjusting the goal's height from 6' to 10' is effortless with 2 lift-assist cylinders in play. The unobstructed "Clear View" tempered glass backboard has a rigid aluminum perimeter frame for increased rigidity and performance. All weather system features stainless steel parts and the complete unit has a black powder coat finish for ultimate weather protection.

Financial Information

- Available project funds from CSA Reserves - *(not confirmed with HOA Board)*
  - ~$101,000 in January 2028, could be accelerated to 2027 with approval

Potential Next Steps

Coolfont Mountainside Association

- Send copy of this overview to community
- Examine financing options/solutions for Option 2
- Poll community for which option they want to move forward with and include the financial options (loan, assessment…) if Option 2 is what the majority want to move forward with.

2026 CMAWS Annual Report

Submitted by: Vesta Kimble, Chair

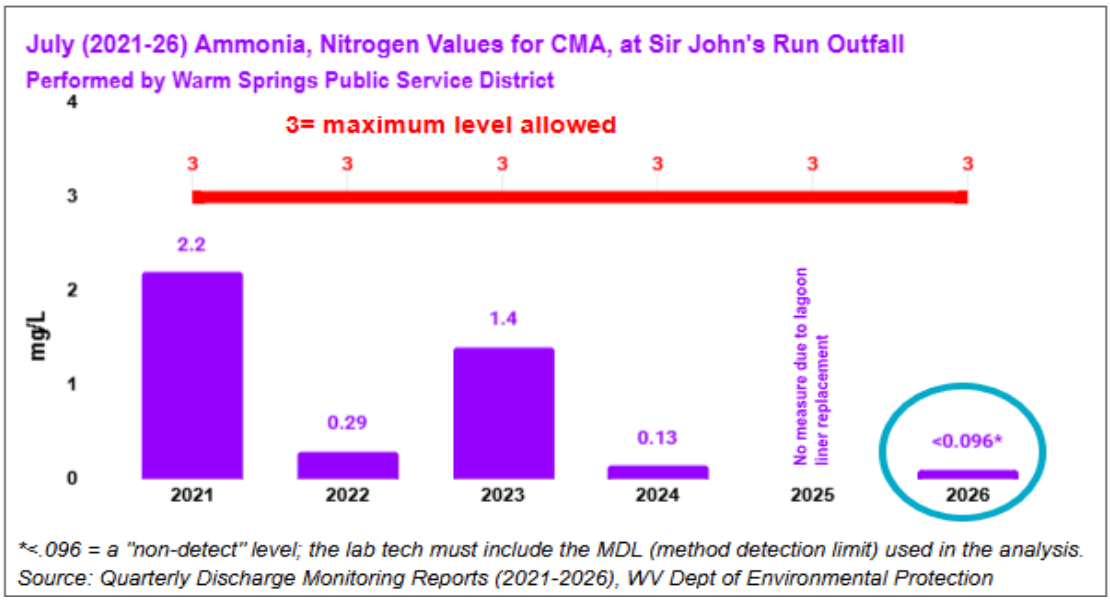

Status of our W&S Systems Operations

- Water: safe and steady but fragile; high occupancy stresses the systems leading to cracking of fittings, burst water lines and over-taxed equipment, such as well pumps.
- Sewer: very good (due to policy for septic tank pumping and due to new liner for the lagoon, and proper management of the treatment system (which includes the wetlands, areas around the lagoon and the wetlands, and the UV lightbulb chamber).

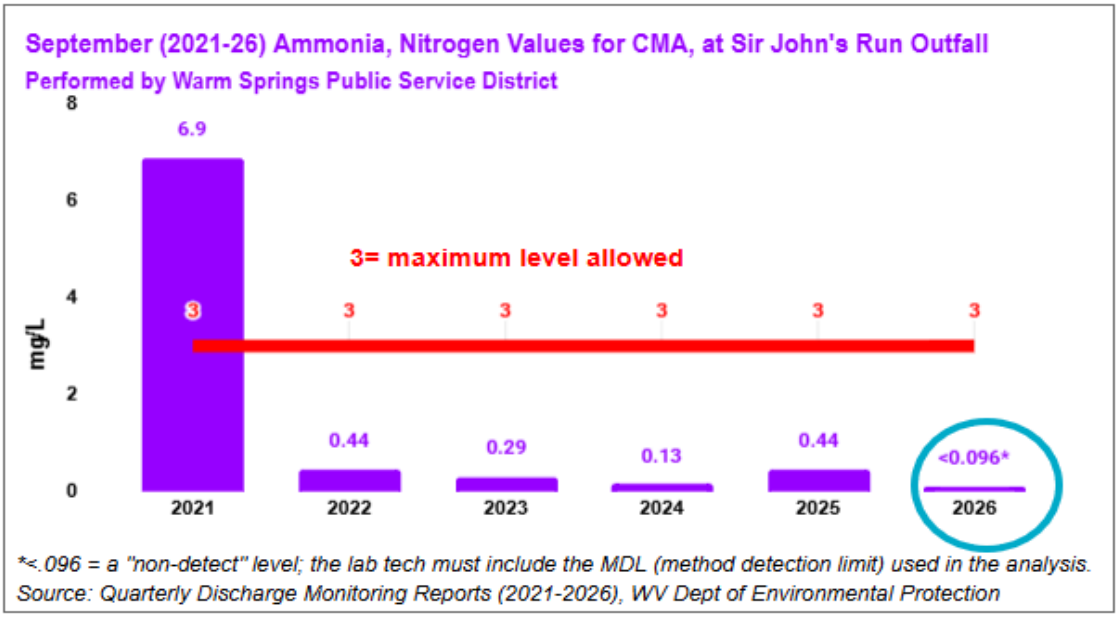

Accomplishments in 2026 to date

Sewage Treatment

- ZERO ammonia and ZERO nitrogen for the past 2 quarters' lab tests at the outflow! Bottom line: we are protecting the environment through recent upgrades of the sewer system as well as implementing policies that matter.

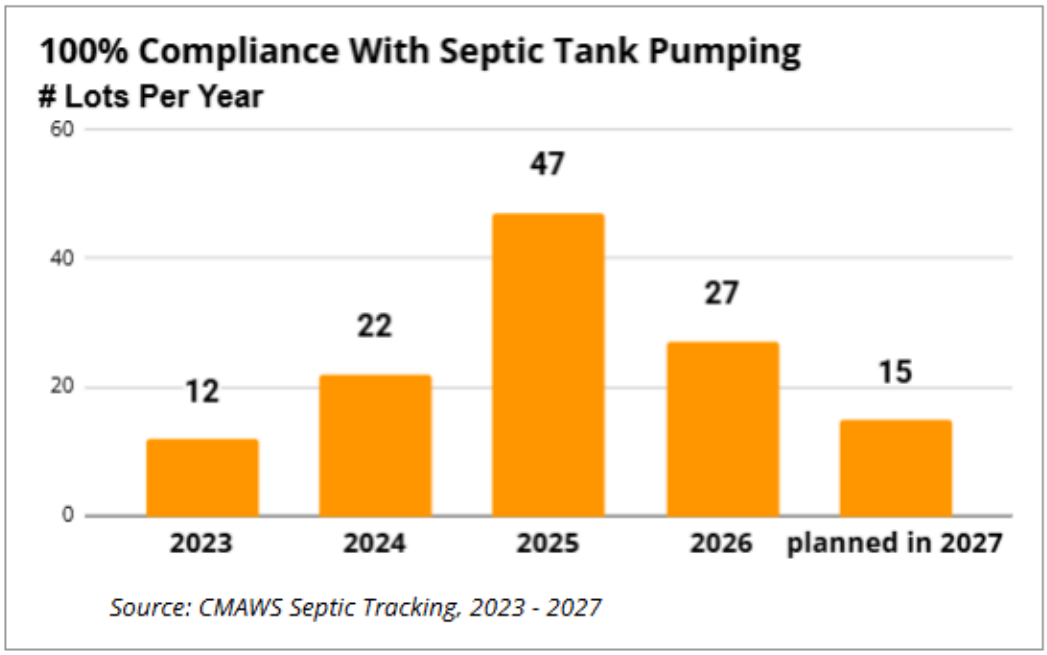

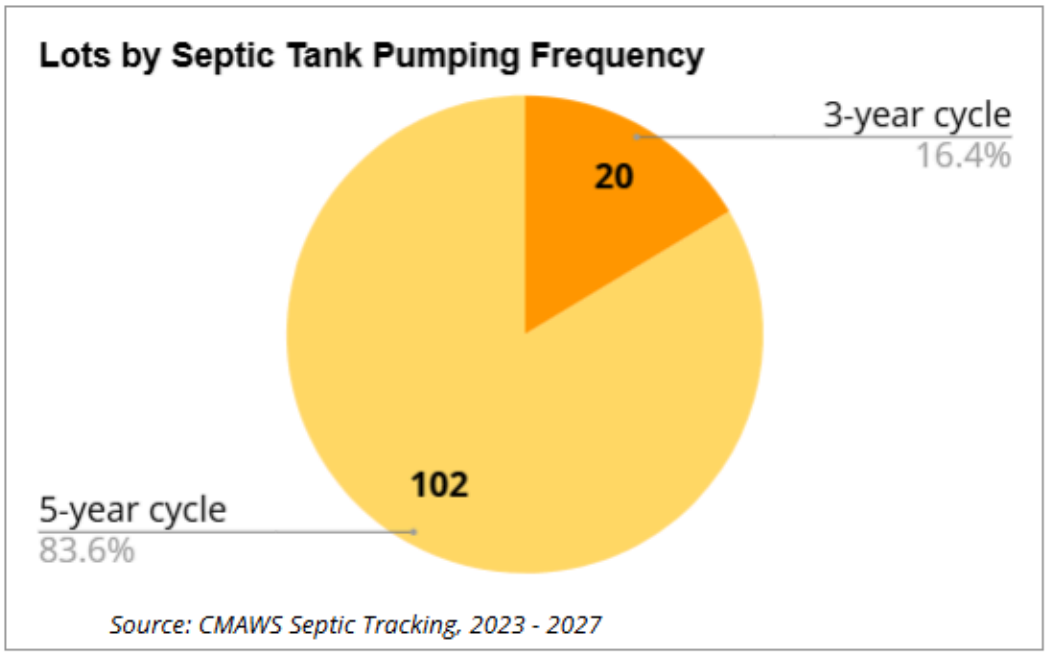

*<.096 = a "non-detect" level; the lab tech must include the MDL (method detection limit) used in the analysis.

- 99% compliance to date on septic tank pumping, due to automation of schedule and dogged persistence to stay up to date (1 property scheduled in October):

- Findings from 2025 WV Bureau of Public Health Sanitary Survey: all major deficiencies have been addressed for both water systems
- Major Replacements and Upgrades:
    - Lift Station Grinder Pump

<u>Water Systems</u>

- Repairs:
    - 18 repairs throughout the water systems so far this year, 15 of them just since in the past 90 days; this is **<u>more than double</u>** our history of 7-8 per year.
    - A few sections (I, L, Upper H and T) with heavy weekend and holiday use sustained repeated leaks/breakages in their water lines due to the high pressure. Replacement parts for our system components are difficult to find and often sub-standard. A limited number of

contractors are willing to work on a system like ours given the challenging terrain, and their services are in high demand.

- Major Replacements and Upgrades
    - South Well Pump
- Filed for a tariff increase with the WV Public Service Commission due to the increasing costs and frequency of repairs, increased prices of materials and labor, and the decrease in billable usage (not to be confused with the unsustainable high water use during peak times of high occupancy). This stress on the system is causing more and repeated leaks in certain sections of our water systems. (The Public Service Commission decides on the rates CMA can charge, so we are awaiting news.)
- Policies:
    - Outage Notification
        - Emails for planned and emergency outages (due to leaks, repairs and replacements)
        - Text messages (a new subscription service proposed to begin in October)
    - Cross Connection/Backflow Prevention
        - 99% compliance with the survey.
    - Leak Adjustments
        - CMA is seeking a waiver from specific PSC for rules to address concerns about repeated leaks at a customers' properties. These owners seek repeated leak adjustments instead of making lasting repairs or replacements of aging appliances.. We currently have a potential of 8 adjustments for the 9/1/2026 bills alone.

<u>Planning Ahead</u>

- Q&A is coming next month for inquiries received via email and telephone; will be posted to CMA website
- Acquisition:
    - CMA issued a Request for Proposals for Management, which resulted in a letter of interest from Warm Springs Public Service District (WSPSD).
    - CMA issued a Request for Information for management, and received two inquiries and upon review of our system, they declined to enter into a management agreement.
    - Discussions continue with WSPSD for an MOU, legal review, Boards' approval, and a proposal to put before membership.

- Capital Needs Plan
  In 2025 we estimated we needed $433,000 for planned capital improvements, but the PSC allowed us to allocate only about $30,000 in funds for capital improvements. Example: we have no back-up pumps or aerators, and per PSC we must rebuild or recalibrate our house meters every 10 years, but it is cheaper to replace them.
- In 2027, the committee will explore requesting a Reserve Study of the water and sewer systems.
