Winter 1994 Volume 2 Issue 2

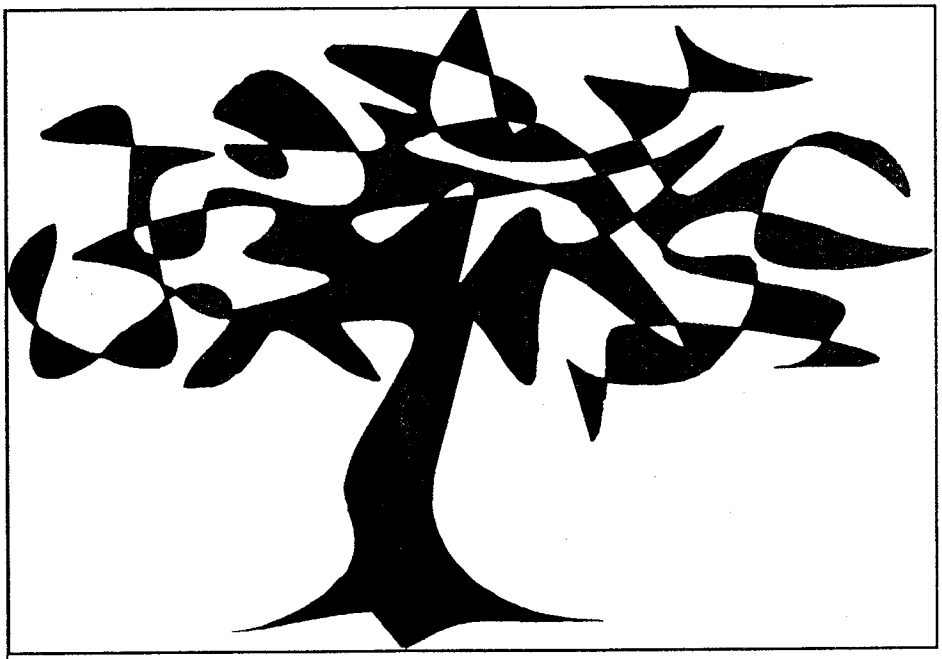

Development Co. & Association Agree!

Finally! On March 7, 1994 CDC (Coolfont Development Co.) and CMA (your Association) signed a new business agreement. The heart and soul of the document has two features. The first is a voluntary payment in the sum of $224,000 by CDC to CMA to upgrade the water and sewer systems owned and managed by CMA. The second is an agreement on an expansion of the community by thirty homes. The membership must approve certain features of the agreement before it goes into effect.

Milestone

The agreement is a landmark in Association work because past experience dealing with the development company coupled with hard experiences in maintaining our infrastructure influenced the final content of the document. The protections for the association included specifying applicable state and county codes, association review of plans before they are presented to the planning commission, inspections and sign off work at agreed upon intervals of construction, and a quality assurance committee containing two engineers, one from CMA and one from CDC.

Experience helped CMA negotiators set standards for construction and identify applicable regulations.

Preservation of trees and quality of water were addressed by CMA representatives as new understandings were reached with CDC....

APRIL 9th at Cacapon State Park for Ratification Meeting - Time: 1:30 pm

Ratification by the general membership is required to set the wheels in motion for infrastructure upgrades and community expansion. A meeting room in the Main Lodge (recreation conference room) at Cacapon State Park off highway 522 South has been reserved for the meeting. Members who cannot attend the meeting may vote by ballot. Members interested in a full explanation of the agreement, its features and risks, will be given full particulars by the negotiators. CMA arbitration committee members as well as board members who have followed the proceedings, will also answer questions. The meeting will benefit everyone, those who reside in Coolfont on a full time basis, new homeowners, lot owners and those who rent their homes to others. The agreement, if approved, will ultimately provide the association with additional sources of income. CMA has been challenged in recent years by the costs involved in maintaining and improving the infrastructure.

THANK YOU:

Special thanks to Don Fox, Herb Jasper, Don Green, and CMA BD. members Black, Doppman, Dupre, Neill, Birnkrant, Bruels & Advisors Broxson, Lewis, Eifert and Piper for all your contributions in formulating the agreement. The CDC team also is recognized for their efforts.

Arleigh Greenblat, President

FUTURE OF COMMUNITY THE FOCUS

THE future is now. A new era in CMA's development is upon us. Thousands of hours over many years by member volunteers has led to the formation of a new business agreement with CDC. This agreement, if approved, will provide funds necessary to upgrade our infrastructure. Our arbitration was solid, but we could only guess at the form or size of any award. Without an arbitration award or this agreement, a Coolfont homeowner could face a $3,200 assessment to bring the water and sewer system up to current state standards. Lot owners could pay $800. A settlement means that the reputation of the community as a state of the art development will be restored. All this translates into higher property values for everyone. Big assessments won't be coming our way. We made our grievances known publicly, so now the whole community has received attention from the state and county. Every matter from water and road quality to sewage treatment is a subject of attention and rightly so. Our chance to now formulate viable management plans is based on income. Special assessments should not be the future; an increase in our present income stream is the answer. Control of our own destiny is also part of the formula. Our association has the talent and ambition to turn the mountainside into a respected community. Now is the time. A vote for the new agreement will solve many problems. The challenge ahead is not easy. We will have to use annual income of about $ 20,000 per year for five years to reach the $325,000 amount needed to upgrade. This can only be done if 2/3rds of the membership says it should be done. A yes vote will do it!

ONE PERSON'S VIEW

Space doesn't allow for point-counterpoint arguments. A negotiation is a give and take process based upon faith and trust by the agreeing parties. There will remain very strong views by those who have served the association regarding chances for full success with any agreement between CDC and CMA. I for one, believe we have a good opportunity to move the community forward. We need infrastructure upgrades, a new income stream, and time to manage our affairs. The proposed agreement provides for all of the above.

Your President
