Summer 2020

## Calling on Community Members During Turbulent Times

by Jason Géno, CMA President

I hope our members are finding time this summer to take a pause during this very difficult period. Spending time at Coolfont is a great way to reduce stress.

My wife, Sharon, and I fully recognize the importance of having, and maintaining CMA as a stress reliever for all members, that's why we continue to be part of the Board.

I would like to ask members to reflect on why they are part of CMA, and consider running this year for one of three board positions. Being part of the board is an excellent way to help CMA progress, and we have been fortunate to have board members who have various talents that translate to leading successful community projects. I am amazed to see the commitment of both committee and board members. If you are interested in running for the board, please contact contact our Nominating Committee, as noted above.

Thanks! Stay safe, Stay well.

**CMA elections for the Board of Directors will be held in September. If you are interested in being a candidate or wish to nominate someone, please send an email to rusty.mccrady@gmail.com and skatz844@aol.com by August 7, 2020.**

**Depending on the venue and Covid-related circumstances, nominations may also be accepted at the Annual Meeting. Nominees will be contacted with additional information about the nomination/election process, which is easy and straightforward. This year, members will elect three owners to serve on the Board.**

## UPCOMING EVENTS

| | | |
|---|---|---|
| Board of Directors Meeting | August 8, 9:00 am | Teleconference |
| Pool Closes for Season | September 7 | CMA Pool |
| Annual Meeting/Elections | September 26, 10:00 am | CMA Barn or Teleconference |
| Membership Dinner | September 26, 6:00 pm | TBD, See Google Group |
| Board of Directors Meeting | October 10, 10:00 am | Tentative/CMA Office |

# Welcome and Potlucks

**by Rosemary Bigelow**

Leila Keese has joined the Welcome Committee and is a very "welcome" addition to the team. With the big turn over in home ownership on the mountainside this year, we've been actively engaged in communicating with our new members. This pace will likely continue given that several more homes are under contract. We completed a major revamp of the welcome communications literature to reflect the community restrictions caused by Covid-19. We have deemphasized in-person visits and increased the information conveyed by the welcome bag, email, and phone. We're trying to make sure everyone knows where to look for information about CMA and Berkeley Springs and who to contact for questions.

**the potluck club**

The potluck dinners are suspended for now. The August potluck was canceled and there are none scheduled until November and December. We hope to have the "all clear" for the holiday season and can enjoy getting together again.

Coolfont Community Pool

**The pool is open for a few more weeks. Thank you for helping provide a safe and healthy pool experience this year. Please remember to call ahead to reserve a spot: 304-258-5245.**

## Thanks!

We extend a heartfelt thanks to Terry & Marsha Moore (P-9) for their years of service to our community as Neighborhood Watch patrol volunteers. Thanks for all your work and dedication to our small community!

## Watch Your Inbox

**CMA will be sending information about the Annual Membership Meeting and Elections in early September.**

**It's very important that all owners/members participate in voting in order to obtain a quorum.**

**Owners will elect three members to the CMA Board and vote for/against the 2021 Proposed Budget for the Association and Water/Sewer.**

# Fun Fact: WV "Swear Jar"

**by Eric Lienhard, G-5**

Both the 2005 and 2009 West Virginia Code listed "Profane swearing and drunkenness" as a crime. The law was eliminated in 2010, and the code number was abandoned until 2011. (Today, Code §61-8-15 prohibits certain forms of demonstrations at funerals.)

2005 / 2009 West Virginia Code §61-8-15. Profane swearing and drunkenness; penalty.

If any person arrived at the age of discretion profanely curse or swear or get drunk in public, he shall be fined by a justice one dollar for each offense.

# Paved with Good Intentions

**by Tom Holz, F-1, Chair, Infrastructure Mapping Committee**

Have you ever wondered how your CMA home address was determined? In collecting maps and documents on CMA's infrastructure, I've found a jumble of information: roadways the county used to recognize (but doesn't now), street names spelled five different ways, house numbers out of sequence, houses with no addresses, and houses with different addresses in CMA, county, phone company, and USPS record systems. It's been an adventure.

Morgan County initially relied on developer- and community-provided street name lists. Some lists added and changed names over the years based on developer/community input, only to revert to the original list years later. For example, CMA once had a road with no name! Instead, its road sign was a bird carved into wood, and there was quite a controversy when it needed to change to a sign with a written name: Woodpecker Drive. On one map, it indicates the name was supposed to be "Pileated Woodpecker Drive."

There's also the demise of Wolverine Lane. It served lots G-5 to G-7 and was recognized in the Morgan County 2005 Road Name List, but alas, no more! For a while, CMA maps renamed Wolverine Lane to Mountainside Road (no, not that one, not that one either, another one…). The once proud Wolverine Lane is now a driveway and the houses have addresses on Mountainside Road.

And poor Whip-poor-will! It's abused with one or two "p's," or "o's," or "l's," with dashes, without dashes! Also, we have one intrepid family who, per the Morgan County GIS system, proudly live at 55 Bob White Trail. Yup, should be Bobcat Trail!

The last bit of interesting trivia is how your house is "supposed" to get its street number. In 2001, WV started providing city-type addresses across the state. It was meant to aid 911 emergency service dispatching and guidance to addresses in rural areas. In some cases, it resulted in changes to or adding house numbers, standardization for new construction, and limiting street names to avoid confusion. You know, like Mountainside Road, Drive, Court, Lane, Loop, Circle, Half-circle, Roundabout, etc. (We once had renters stop by about 10:30 pm trying to find the place they hoped to sleep for the night! They were looking for "#14." It took a little conversation to figure out it was I-4 they were seeking.)

Morgan County did its part to aid the effort, establishing the 911 Addressing and Mapping Ordinance. I heard from several people how the house numbers were determined by how many feet the house was from where the street began. I could never figure out how my place, #20 and at least a 100 feet down the road, could be seen as being 20 feet from the beginning of the road, let alone how my neighbor's house could be #56. Certainly their house is more than 36' from mine.

The truth: In Morgan County a house number isn't based strictly on how many feet it is from the beginning of the road, but rather, how many "intervals" from the beginning of the road. An "interval," per the ordinance, is the "distance along a roadway centerline of 5.28 feet, there being 1,000 intervals per center line mile…" I've done the math! For my house at #20, that's 20 x 5.28' = 105.6' and it works out about right. But the ordinance goes on: "creating 500 (even address numbers) intervals of 10.56 feet per centerline mile on the right side…500 (odd address numbers) intervals of 10.56 per centerline mile on the left side of a road." I don't get that last part…if you do, please explain it, maybe with pictures!

This has all been tongue-in-cheek, but there's a serious side! The fire department, sheriff, and ambulance service all use your street name and number to find you in an emergency. You may want to ensure your house address is correctly recorded in the Morgan County 911 system - and with the County Assessor, GIS Director, and Address Coordinator (Peggy Oakes, 304-867-3130, poakes@morgancountywv.gov).

After all, you don't want the Sheriff or ambulance driver looking for #14 when you need help!

## Rules & Regulations: Exterior Appearance

The individual properties at Coolfont must be maintained properly so as not to detract from the mountainside's scenic beauty. Members are urged to maintain their residence in good condition, their driveway well maintained, and their lot neat and uncluttered.

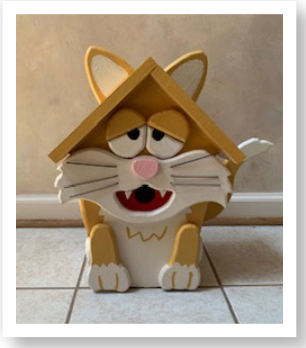

**Garbage and Trash Containers:** These must be securely covered, "bear proof," enclosed, maintained in good condition, and located so that they do not distract from the natural forest environment or are not unsightly from the road or neighboring property(s). The construction and replacement of trash containers requires written CMA approval.

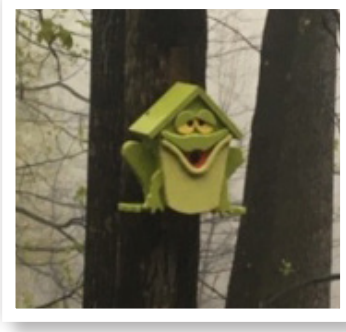

**Clothes Drying:** Outdoor clothes drying should be done only in screened areas, and not be visible from neighboring property or CMA roadways.

**Playground Equipment:** Playground equipment must be of colors consistent with CMA building standards.

**Antennas and Satellite Dishes:** The installation of antennas and satellite dishes requires CMA approval. These must be mounted in locations on the homeowner's property so as to minimize visibility from other CMA lots. Requests to install satellite dishes and antennas will be reviewed promptly and approved by CMA.

**Full document online: CMA Basic Rules**

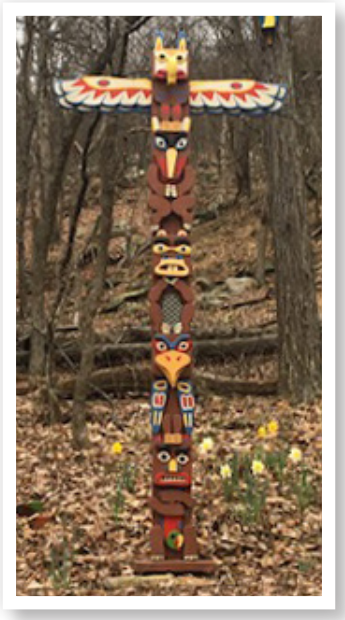

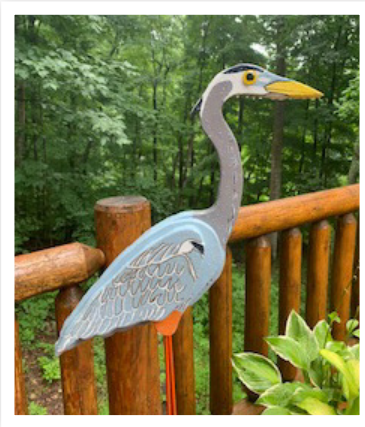

## Directory Updates

Keep your Membership Directory current with the updates noted below. We will also update the PDF available on the CMA website.

# Purple Painted Trees: "No Trespassing"

**by Eric Lienhard, (G-5)**

Ever wonder what the significance of the purple stripe on some trees in West Virginia is? In 2016, West Virginia passed a law, expanding the definition of "Posted Land" under Chapter 61 Article 3B Trespass of the State Code. In addition to the traditional ways of posting land, the law provides West Virginians the option to use purple paint to alert individuals from entering their property.

The code states:

> "Boundaries marked with a clearly visible purple painted marking, consisting of one vertical line no less than eight inches in length and two inches in width, and the bottom of the mark not less than three nor more than six feet from the ground or normal water surface. Such marks shall be affixed to immovable, permanent objects that are no more than one hundred feet apart and readily visible to any person approaching the property. Signs shall also be posted at all roads, driveways or gates of entry onto the posted land so as to be clearly noticeable from outside the boundary line."

Therefore, private land owners are no longer faced with having to continually replace printed signs that often end up vandalized or weathered and tattered by the elements. Many signs go missing weeks before deer season, spring mushroom hunting or fall ginseng digging.

Purple paint provides a more durable alternative for communicating the same message to the public. Clearly, once a property is marked in this style, it will stick around for some time!

Editor's Note: Remember, CMA's hiking trails are marked with "blazes" of white or blue paint: large spots of paint, not bands painted around the trees.

# From the Archives

**The Gettysburg Times (Gettysburg, PA)**
**September 19, 1969**

## CHOICE GOSSIP

For your eyes only, gossip items from Coolfont's Treetop House, the different restaurant in nearby Berkeley Springs, W. Va.:

Item 1—Mrs. L. G., Hagerstown, did not burn her husband's draft card in Treetop House. Truth is she burned her calorie-counter card. She said, "Food is too good here to worry about calories!"

Item 2—Mrs. J. J., Gettysburg, threw creamed spinach at her husband in Treetop House. Mr. J. J., eating fried chicken, exclaimed, "This is better than my mother used to cook!" Mrs. J. J. snapped, "You've never said that about MY chicken!" And the spinach flew.

Item 3—Mrs. A. T. and Mrs. W. W., Frederick, are still glaring at each other. The glares began in Treetop House as they tried to decide who deserved credit for recommending Treetop House for a club banquet.

Visit Treetop House. Brighten a weekend. Dine amid scenery of treetops, mountains, lakes. Open weekends, Fri. 6-9; Sat. noon to 9; Sun. noon to 8:30. Mon. 6-8:30. Closed other days. Drive to Berkeley Springs; then take Rt. 9 west ¾ mile and turn left for Coolfont's Treetop House. Reservations if you like. Call (305) 258-1793 or 2818. Ask about banquet rates. Drop by for choice gossip, choice food, great scenery.

Editor's Note: For slightly more current information on hours and events, visit Coolfont.com.

# Playing by the Rules

All CMA residents benefit when our guidelines are respected and practiced by the entire community. These rules help maintain our natural and serene environment - the reason we all enjoy our Coolfont homes. Owners, renters, and their guests who do not conform to CMA regulations disrupt our kind community and may be subject corrective actions - including a neighborly call to the property owner.

It is the owners' responsibility to ensure their residents, guests, and renters (short and long term) are aware of the CMA guidelines. Owners with rentals should provide copies of the guidelines at their property. These include the Regulations Regarding the Use of Property and Rules and Regulations We Live By – The CMA Residential Standards. Both are available on the CMA website.

# A Trip Down the Drain

**by Joe Van Meter, K-16**

Have you ever wondered why CMA staff ask for information about your septic tanks, specifically, the last time you had them pumped? There's a good reason for that question, and this article will present important background information to explain why ignoring your septic system could eventually cost you money; OR, it could potentially cause dire consequences to you and your neighbors. This could include contamination of CMA's water supply, CMA paying significant environmental compliance fines, or a potential shut-down of our wastewater treatment services by the government.

## In the Beginning

First, let's review some fundamental decisions that CMA developers made during the early 1960s, while contemplating a new, moderate-sized development in a wooded area outside the town of Bath. The developers realized the community's location had no access to a potable, public water supply; but also, its location was substantially distant from a municipal sewage plant and/or primary sewage trunk line. In both the water and sewer cases, CMA'S developers determined they would need to build their own facilities to support the community. For the water supply, they bored a well (eventually two wells), and they built a water distribution infrastructure (see article on Water in Spring 2020 newsletter).

For its sewer system, CMA's developers' only choice was to use one (or more) septic tanks, either installed on each individual property, or one large tank for the whole development. The community's staggered development plan precluded the latter. The practical choice was to require septic tanks on each individual property. Only one problem: A septic tank requires a septic drain field (a "leach field") on the property. However, that works ONLY when soil conditions permit. Unfortunately, most of the home sites did not "Perc" – the hard, rocky, shale-type soil does not rapidly absorb water deeply into the ground. Therefore, the developer installed a network of underground pipe connecting most CMA properties to a sewer processing system. This consists of a lagoon, wetland, and UV treatment.

Check your September Water/Sewer bill for this handy refrigerator reminder magnet.

## Setting the Stage

In CMA's system, individual home's septic tanks serve as **Stage One** of a natural four-stage system to process raw sewage; thereby enabling CMA to satisfy federal and state pollution control requirements at a relatively low cost.

The lagoon operates as **Stage Two**, processing the septic tank effluent from each property by exposing the lagoon surface to the sun's ultraviolet radiation. It also oxygenates the water-borne bacteria and other biological contents. Oxygenation is a natural chemical process that can kill many types of bacteria.

In response to the EPA's and WV Department of Environmental Protection's (WV DEP) increasingly stringent requirements to limit nitrogen-bearing compounds in wastewater, CMA's developers later added a third natural wastewater treatment process. They constructed **Stage Three**, a purpose-built wetland adjacent to the sewage lagoon. The wetland is composed of a shallow network of permeable PVC pipes that slowly carry outflow of lagoon fluid through plants that are specially selected based on their ability to selectively remove nitrogen-bearing compounds through their root structure.

CMA's wastewater treatment process is completed in **Stage Four** with direct irradiation of the liquid outflow from the wetland with ultraviolet energy. CMA constructed a station that shines extremely bright UV lights onto clear glass tubes carrying the

liquid flowing from the wetland. As the outflow slowly passes by the ultraviolet lamps, the light kills any bacteria that may remain after passing through the previous stages.

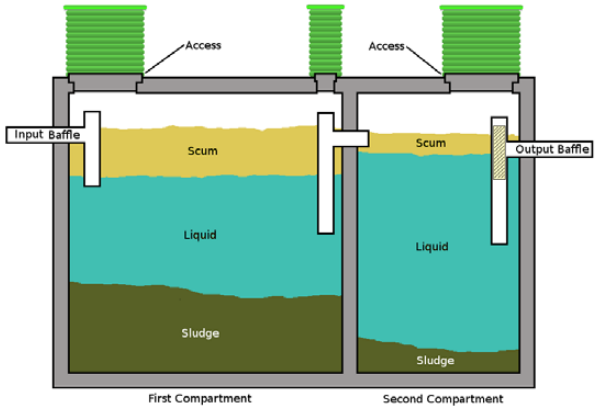

After CMA's four-stage wastewater treatment process is complete, the clean outflow is released into a tributary of Sir John's Run that flows through a corner of CMA's common property - near the intersection of Cold Run Valley Road and Herbert Quick Drive. Sir John's Run flows into the Potomac River near Hancock, Maryland.

## Maintaining the System

Periodically, each element of the four-stage process requires maintenance to assure it is fully performing as it was designed. Because the four-stage process was designed to depend primarily on natural and biological processes (and not chemical processes), material costs are minimal. However, there are labor costs involved in maintaining this fragile system. For example, the lagoon requires periodic attention to prevent weeds from growing near or into its shallow waters; aging wetland distribution pipes need repair or replacement; and the ultraviolet station occasionally requires replacement bulbs or electrical components. It's important to note that CMA maintains multiple redundant subsystems to avoid issues if outages impact the sewage treatment system.

Our contractor, Warm Springs Public Service District, periodically inspects and maintains the infrastructure that performs Stages Two through Four, as described above with guidance and oversight by CMA's volunteer Sewer Chairperson. They ensure that the treatment system performs in accordance with the designer's specifications and meets or exceeds federal, state, and local requirements.

Perhaps more importantly, the WV DEP, working closely with EPA, requires periodic inspections of CMA's treatment system. It also requires that a laboratory test be regularly conducted to assure that water released by our sewer system is in full compliance with current standards, in order to maintain our license to operate. WV DEP regulators have the power to shut down CMA's system in the event that CMA is found to not be in compliance with current standards and guidelines.

An approximation of a dual tank septic system. Yours may be different.

## Doing Your Part

In a healthy, well maintained septic tank, the effluent (liquid) material that flows into CMA's system is primarily composed of water. Heavy solids, fecal matter, food particles, and grease drop to the bottom and become part of the aggregated material (sludge) that accumulates at the bottom of the tank. Water-borne biologic materials are somewhat lighter and float to the top of the tank. A pipe, or baffle, in the first tank allows the effluent to flow to the second septic tank. There, additional solids settle out before the effluent enters CMA's treatment system.

When the septic tank is not regularly pumped out by a licensed professional septic cleaning firm, the tank may begin to release accumulated solids into CMA's system, through the interconnected network of underground pipes and into the CMA sewage lagoon - creating a potential economic disaster for all of us. **Owners must take this responsibility very seriously; to ensure that their own septic tanks are professionally cleaned on a regular basis.** That's why CMA asks, "When did you last have your septic tanks serviced?"

So, the seafood that you order at your favorite restaurant this weekend likely grew up as a teenager in the Chesapeake Bay in waters that perhaps came from your property here in Berkeley Springs, West Virginia. It's a small world.

## Coming Up Next

The next article of the CMA's Water and Sewer series will discuss when to have your septic tank pumped, and what you can do to keep your septic tank healthy – including what NOT to put down your drains.

# We will miss you

### Larry Merola

We all lost a great friend, neighbor, and CMA stalwart when Larry Merola passed away in June. Larry and Flo (K-3 Villa Firenze) came to Coolfont in 2002 and were married on the Mountainside (they married again a month later in a tiny Italian town where Larry's family roots lie). Mary Kay and I went along to witness and enjoy the joy in life which surrounded Flo and Larry. We were grateful for their wonderful friendship. - Gordon Cloney (K-6)

Larry Merola's death reminds me of the quality of community we have long enjoyed because of the generous involvement of residents like Larry - his willingness to donate his time and talents. With his wife, Flo, their hospitality and friendly inclusiveness were symbolic of Mountainside tradition. It took work like theirs to create a cohesive and caring community. We depended on each other to keep the Mountainside running, while maintaining the privacy we all treasure, and we grew to love each other as family - Leila Keese (K-7)

### David Barrett

One of Coolfont's longest resident families lost a beloved member in May – David Barrett. Son of Marie and Charlie Barrett, former owners of "Aloft" (K-4), David died unexpectedly. He was just 55-years old. Marie and Charlie brought their kids to Coolfont many times over the decades, to climb the mountain, swim in the pool (which Charlie designed), and get close to the wonders of this natural paradise. David loved their amazing house, this place, and its people - and we loved him right back. This family's loss is our shared loss, as the Barretts are a long, strong thread in our mountainside fabric. - Jackson Bain (E-7)

During one of David's visits to Coolfont, he noticed a new bench at his favorite spot to watch the nighttime stars. He loved that someone picked that location for the bench. Now, when we sit there, we'll be looking at David's star as it continues to shine brightly upon us. - Cindy Van Meter (K-16)

## Save a Little $$$!

Just a reminder that Morgan County provides a nice discount (2.5%) if you pay your property taxes and fire and ambulance fees before September 1. For information on your tax bills and the early payment discount, contact the Morgan County Sheriff's Tax Office at 304-258-8562 or visit morgancountywv.gov/taxoffice.

## Board Shorts

May 9 Board Meeting (via Teleconference)

- Approved minutes from March 2020 CMA and W&S Meetings
- Approved $2,200 for maintenance work to clean, repair, and stain/paint tennis court stairs, barn ramp, and Gateway entrance structure. Gateway Maintenance, Barn Maintenance, Recreation
- Approved updated Site Manager contract for May 1, 2020 - Dec. 31, 2020

June 27 Board Meeting

- Approved minutes from May 2020 CMA and W&S Meetings
- Approved $1,200 for TreeWorks to clear trees downed in recent storms. Forest Maintenance
- Approved up to $8,000 for structural repairs for Barn Lean To. Reserves
- Ratified Board decision for Pool hours and procedures under COVID-19 restrictions
- Approved Rental Pool Fee of $60 for 2020
- Approved $500 for road repair on Bobcat. Road Maintenance
- Approved $1,350 for culvert/ditch work in various locations. Storm Water System Maintenance
- Approved $500 for Meadow mowing. Gateway Maintenance
- Approved increase for WSPSD for sewer contract to $650/mo, effective 9/1/20

There was no Board Meeting in July.

## Water Issues?

**Warm Springs Public Service District**

Weekdays, 9:00 am to 5:00 pm:
304-258-4118

All other times Morgan County non-emergency: 304-258-0305

Provide your name, address, lot number, and the nature of the problem.

## Quick Tips

### Improve Your Home's Survivability of a Wildfire

- **REMOVE** leaves, debris, and other flammable material from roof, gutters, and on/under the deck
- **SCREEN** areas below decks and porches with wire mesh to help prevent material from accumulating
- **COVER** exterior attic and soffit vents with wire and enclose eaves
- **INSPECT** shingles and replace missing shingles

### Tips for Landscaping Around Your Home

- **REMOVE** dead vegetation and other flammable materials, especially within 5 feet of the home
- **PRUNE** tree limbs to 10 feet from structures
- **MOVE** construction material, trash, and woodpiles at least 30 feet away from structures
- **DISPOSE** of branches, weeds, leaves, pine needles, and grass clippings
